Measurement note. Google Ads' conversion column reads **0** for the credit era; the independent D1 database verified **1** paid lead. D1 is the verified count used throughout this report.

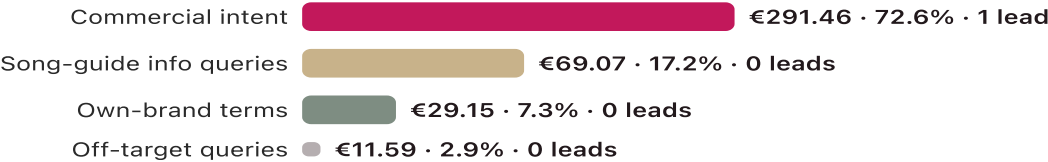

The credit era's one verified lead

- 18 Aug · query **"wedding band prices ireland"** → /wedding-band-cost-ireland/
- Qualified: wedding Jun 2027, ~100 guests, Landmark Hotel, Carrick-on-Shannon
- Same couple returned 22 Aug via a **chatgpt.com referral**, requesting The Beat Boutique by name — a return visit, not a second acquisition

Data completeness: outcome fields are populated for 13 of 31 lead records; the remaining 18 have no outcome recorded yet. Quoted and booked counts are therefore minimums — actual progression may be higher.

- Data coverage notes
- Booking value and revenue are not recorded in D1 — return on ad spend is not computable
 - Beat Boutique's own-site bookings go to email and are **not counted here**
 - GA4 excluded — current Google credential lacks the Analytics API scope
 - One ChatGPT-referred enquiry in Aug — first recorded lead from an AI assistant surface
